## LA GAMMA CHOCADO

Dal laboratorio di innovazione di Silikomart Professional nasce Chocado: la nuova gamma di forme progettate da cioccolatieri per i cioccolatieri.

Silikomart Professional approda nel settore dell'alta cioccolateria portando con sé tutti i plus che caratterizzano il nuovo materiale Tritan™ e il silicone liquido platinico. Dall'alta performance, alla resistenza termica e all'estrema durevolezza.

I designer Silikomart con la gamma Chocado mirano inoltre ad ampliare gli orizzonti del cioccolato: alcune delle forme vengono abbinate a stampi in silicone dando così la possibilità ai cioccolatieri di realizzare inserti perfetti, unendo nuovi sapori e consistenze al cioccolato. I cioccolatini estivi ne sono l'esempio, perfetti da proporre anche nei mesi dove il consumo del cioccolato si riduce.

All'interno della gamma Chocado nasce inoltre una collezione signature, dove alcuni tra i più acclamati professionisti del panorama internazionale, Paul Occhipinti, Alexandre Bourdeaux, Vincent Guerlais, David Vidal, Kirsten Tibballs e Andrey Dubovik danno vita a tre diverse forme per ciascuno di loro: una per realizzare Praline, una per Snack Bar e una per Tablette.

### *The Chocado range*

*From the innovative laboratory of Silikomart Professional comes Chocado: the new range of shapes designed by chocolatiers for chocolatiers.*

*Silikomart Professional lands in the haute chocolatier sector bringing with it all the advantages that characterize the new Tritan™ material and the platinic liquid silicone. From high performance, to thermal resistance and extreme durability.*

*Through Chocado collection, Silikomart designers aim to broaden the horizons of chocolate: some shapes match with silicone moulds, in order to give the chance to chocolatiers to create perfect inserts, combining new flavours and textures and giving life to the so called "summer chocolates". These chocolates will be the perfect to offer in those months where the chocolate consumption decreases.*

*Within Chocado range it is presented a collection designed and signed by some of the most acclaimed professionals on the international scene: Paul Occhipinti, Alexandre Bourdeaux, Vincent Guerlais, David Vidal, Kirsten Tibballs and Andrey Dubovik. Each of them created three different shapes, one to make pralines, one for snack bar and one for tablette.*

# The new trays range by Silikomart is born, produced in Italy with 100% compostable material.

**COMPOSTABLE:** a material turns into compost due to the decomposition (it must occur for at least 90% in just 3 months).

**RECYCLABLE:** once the life cycle is completed, materials and products are subjected to physio-chemical and / or mechanical processes that transform them into a new raw material or product.

**BIODEGRADABILITY:** the ability of organic substances (and some synthetic compounds too) to be degraded into simpler substances due to the enzymatic activity of microorganisms.

La vetrina che funziona invita il cliente a comprare! The shop window is an invitation to purchase!

Non bastano un ricco assortimento e la varietà dei colori e delle forme: sono essenziali anche l'ordine, la pulizia e la cura con cui i prodotti vengono esposti.

Sì, perché la vetrina di un gelatiere "parla" e comunica ai suoi clienti la qualità del suo lavoro, rispecchia il suo metodo e la sua professionalità. Silikomart, leader mondiale nelle forme per l'alta gelateria, da sempre all'avanguardia nella ricerca e attenta alle esigenze del mercato, ha ideato una nuova linea di piattini compostabili e in plastica riutilizzabili, dedicati al mondo della pasticceria fredda: eleganti e comodi per presentare, stoccare e maneggiare al meglio le preziose e delicate monoporzioni di ogni gelatiere, grazie a un pratico invito alla presa e un utile fondo antiscivolo, a garanzia di uno stabile posizionamento.

Your shop window "speaks" to your clients communicating them the quality of your work, reflecting your method and professionalism.

Silikomart, with its avant-garde research aimed at satisfying the demand of the market, has designed a new range of compostable trays dedicated to the white art's world: elegant and handy trays in order to present, stock and handle the precious single portions of pastry chefs in the best way, also thanks to a practical grip and to a useful non-slip base to guarantee a steady positioning.

## Compostable Trays

Le proprietà compostabili del piattino sono pensate per uno smaltimento più semplice per il professionista e sostenibile per il nostro pianeta.

*The compostable properties of the trays are designed for an easier disposal and a sustainable solution for our Planet.*

# LIQUID SUGAR PASTE

INNOVATION

Liquid Sugar Paste di i78 è l'innovativa pasta di zucchero a colata. Quando si utilizza la classica pasta di zucchero da copertura è molto importante stenderla in modo uniforme, evitando antiestetiche grinze e senza lavorarla troppo perché diventerebbe appiccicosa e non liscia. Liquid Sugar Paste di i78 risponde a queste necessità: è un gel bianco pronto all'uso dalla consistenza densa che può essere colorato e aromatizzato secondo le proprie esigenze. In poche semplici mosse sarà possibile ricoprire in modo perfetto qualsiasi tipo di torta. Con il prodotto avanzato è possibile sia preparare della pasta di zucchero da modellaggio sia della crema al burro da decorazione.

*Liquid Sugar Paste by i78 is the innovative pouring sugar paste. Using the classic sugar paste for cake coverage it is very important to spread it evenly, avoiding unsightly wrinkles and without working it too much because it would become sticky and not smooth. Liquid Sugar Paste by i78 meets these needs: it is a ready-to-use white gel with a thick consistency that can be colored and flavored according to your needs. In a few simple steps it will be possible to perfectly cover any kind of cake. With the leftover product it is possible to prepare both modeling sugar paste and decoration buttercream.*

*Liquid Sugar Paste de i78 est l'innovante pâte à sucre liquide. Lors de l'utilisation de la pâte à sucre classique pour le recouvrement, il est très important de l'étaler uniformément, en évitant les inesthétiques plis et sans trop la travailler car elle deviendrait collante et non lisse. Liquid Sugar Paste de i78 répond à ces besoins: c'est un gel blanc prêt à l'emploi de consistance épaisse qui peut être coloré et aromatisé selon vos besoins. En quelques étapes simples, il sera possible de recouvrir parfaitement tout type de gâteau. Avec le produit avancé, il est possible de préparer à la fois de la pâte à sucre à modeler et de la crème au beurre pour décoration.*

## ISOMALTO

L'isomalto è un sostituto naturale dello zucchero. Si tratta di un disaccaride composto dai due zuccheri glucosio e mannitol. L'isomalto non ha l'indesiderato "effetto di raffreddamento" (cooling effect) proprio di altri zuccheri alcolici. Può essere utilizzato anche per la scultura di zucchero ed alcuni lo preferiscono in quanto cristallizza più lentamente. È trasparente (in questo differisce dal caramello) quindi potete lasciarlo così o colorarlo (aggiungendo dei coloranti in gel prima di scioglierlo). Il sapore è uguale a quello del normale zucchero. Raffreddandosi più lentamente del caramello, si ha un pò più di tempo per modellare le decorazioni.

*Isomalt is a natural substitute for sugar, which is mainly used for its physical characteristics similar to those of sugar. Isomalt is a disaccharide composed of two sugars glucose and mannitol. The isomalt can be dissolved either in the microwave or in a pan with double bottom. Isomalt is transparent (this differs from caramel) then you can either leave as it is or colour it (put the gel colour before it is dissolved). The flavour is equal to that of regular sugar. It cools more slowly than caramel and you have a little more time to shape the decorations.*

Item: 99.527.01.0001  
Size: 500g  
Pcs/master: 6  
EAN: 8051085344406

*L'isomalt est un substitut naturel du sucre, qui est principalement utilisé pour ses caractéristiques physique similaires à celles du sucre. L'isomalt est un disaccharide composé de deux sucres glucose et le mannitol. L'isomalt n'a pas indésirable "effet de refroidissement" que les autres sucres. L'isomalt peut également être utilisé pour la sculpture du sucre et un peu le préfère à sucre parce qu'il cristallise plus lentement. L'isomalt est transparent (ceci diffère de caramel) alors vous pouvez laisser aussi ou le colorer et mettre le gel colorant avant la dissolution. L'arôme est égale à celui du sucre ordinaire. Il est vrai qu'il se refroidit plus lentement que le caramel, donc vous avez un peu de plus de temps pour façonner les décorations.*

## GOMMA DI XANTHANO

Utilizzata come emulsionante e addensante per tutti i tipi di alimenti, dalle salse fino ai dolci e bevande. **Spume e mousse:** in ricette dolci come la panna montata, la meringa o anche mousse ne aumenta la stabilità, facendole "scendere" più lentamente. In questo caso, 1g per litro sarà sufficiente.

**Geletti:** è un'opzione perfetta per aumentare la sua consistenza, poiché è necessario usare meno grassi nelle ricette. Agisce anche come emulsionante, favorendo la formazione di microbolle d'aria che conferiscono volume e leggerezza al gelato.

**Dolci e prodotti da forno o pasticceria:** ti sarà di grande aiuto per aumentare la compattezza e migliorare la consistenza di qualsiasi pane, dolce, biscotto o torta che vorrai preparare.

Item: 99.526.01.0001  
Size: 40g  
Pcs/master: 6  
EAN: 8051085345502

*Used as an emulsifier and thickener for all kinds of foods, from sauces to desserts and drinks.*

***Foams and mousses:** in sweet recipes such as whipped cream, meringue or even mousses it increases their stability, making them 'go down' more slowly. In this case, 1g per litre will be sufficient.*

***Ice cream:** this is a perfect option to increase its consistency, as less fat needs to be used in recipes. It also acts as an emulsifier, favouring the formation of micro air bubbles that give ice cream volume and lightness.*

***Sweets and baked goods or pastries:** it will help to increase the firmness and improve the consistency of any bread, cake, biscuit or pie you wish to prepare. Utilisé comme émulsifiant et épaisseur pour toutes sortes d'aliments, des sauces aux desserts et aux boissons.*

***Mousses:** dans les recettes sucrées telles que les crèmes fouettées, les meringues ou même les mousses, il augmente leur stabilité, ce qui les fait "descendre" plus lentement. Dans ce cas, 1 g par litre sera suffisant. **Crème glacée:** c'est une option parfaite pour augmenter sa consistance, car il faut utiliser moins de matières grasses dans les recettes. Il agit également comme un émulsifiant, favorisant la formation de microbulles d'air qui donnent à la crème glacée volume et légèreté.*

***Sucreries et produits de boulangerie ou de pâtisserie:** il aidera à augmenter la fermeté et à améliorer la consistance de tout pain, gâteau, biscuit ou tarte que vous souhaitez préparer.*
